Classwork Lab:

Creating an IAM Group and Adding
Users

Levine, Miles L
MLEVIN56 ENPM665 0101

Step 5.7) Screenshot of the AWS sign-in page showing the MFA prompt or the successful login after entering MFA code:

The screenshot displays the AWS IAM console interface. At the top, the AWS logo and a search bar are visible. The breadcrumb navigation shows 'IAM > Users > IAMUserInClass9-24'. The left sidebar contains the 'Identity and Access Management (IAM)' section with a search bar and a list of navigation links: Dashboard, Access management (User groups, Users, Roles, Policies, Identity providers, Account settings, Root access management), Access reports (Access Analyzer, Resource analysis, Unused access, Analyzer settings, Credential report), and CloudShell. The main content area features a green notification banner stating 'MFA device assigned' with a close button. Below this, the 'Multi-factor authentication (MFA) (1)' section includes a 'Remove' button, a 'Resync' button, and an 'Assign MFA device' button. A table lists the assigned MFA device with columns for Type, Identifier, Certifications, and Created on. The table shows one virtual MFA device with the identifier 'arn:aws:iam::904727092191:mfa/iphone16.9-24', 'Not Applicable' certifications, and a creation date of 'Wed Sep 24 2025'. Below the MFA section, the 'Access keys (0)' section has a 'Create access key' button. At the bottom, the 'API keys for Amazon Bedrock (0)' section includes an 'Actions' dropdown and a 'Generate API Key' button. The footer shows the copyright notice '© 2025, Amazon Web Services, Inc. or its affiliates.', links for Privacy, Terms, and Cookie preferences, and a system tray with weather information (73°F, Cloudy) and the time (9:11 PM, 9/24/2025).

MFA device assigned
You can register up to 8 MFA devices of any combination of the currently supported MFA types with your AWS account root and IAM user. With multiple MFA devices, you only need one MFA device to sign in to the AWS console or create a session through the AWS CLI with that user.
4 minutes ago (2025-09-24 2:03 EDT)

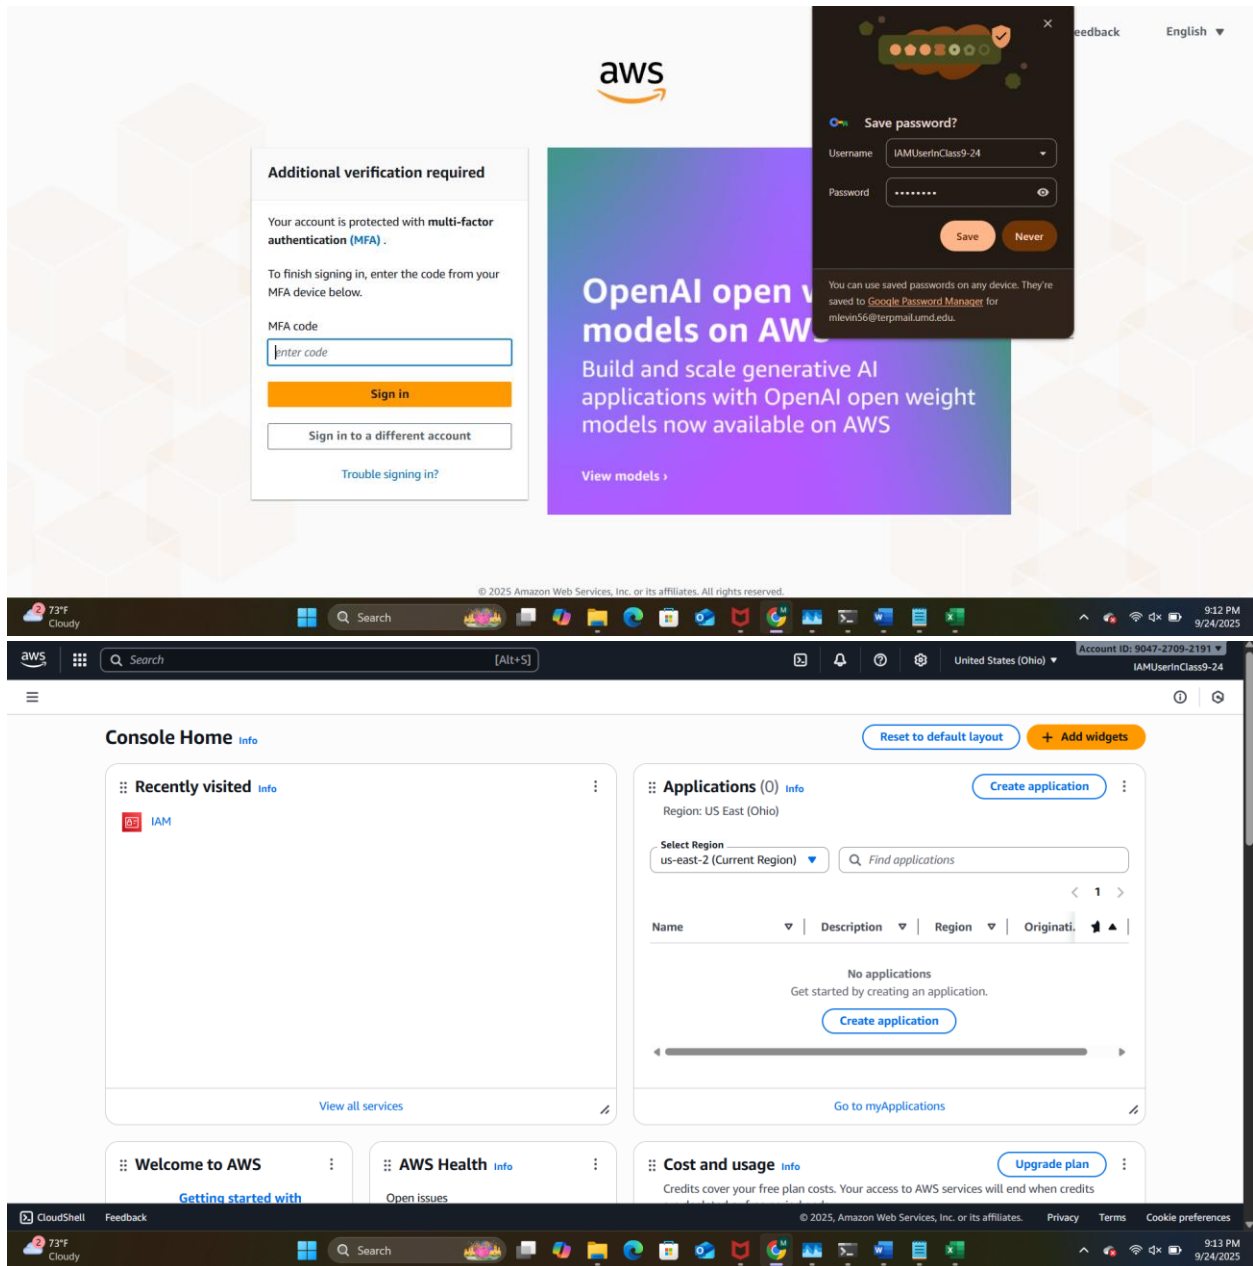

Multi-factor authentication (MFA) (1) Remove Resync Assign MFA device
Use MFA to increase the security of your AWS environment. Signing in with MFA requires an authentication code from an MFA device. Each user can have a maximum of 8 MFA devices assigned. [Learn more](#)

Type	Identifier	Certifications	Created on
☐ Virtual	arn:aws:iam::904727092191:mfa/iphone16.9-24	Not Applicable	Wed Sep 24 2025

Access keys (0) Create access key
Use access keys to send programmatic calls to AWS from the AWS CLI, AWS Tools for PowerShell, AWS SDKs, or direct AWS API calls. You can have a maximum of two access keys (active or inactive) at a time. [Learn more](#)
No access keys. As a best practice, avoid using long-term credentials like access keys. Instead, use tools which provide short term credentials. [Learn more](#)

Screenshot of Administrators Group with attached policy:

The screenshot displays the AWS IAM console interface. On the left, the navigation pane shows the 'Identity and Access Management (IAM)' section with options like Dashboard, Access management, and Access reports. The main content area is titled 'Administrators' and shows the 'Permissions' tab. The 'Summary' section indicates the group name is 'Administrators', created on September 24, 2025, with an ARN of 'arn:aws:iam::904727092191:group/Administrators'. Below this, the 'Permissions policies (1)' section shows a table with one policy attached: 'AdministratorAccess' of type 'AWS managed - job function'. The table has columns for Policy name, Type, and Attached entities.

Policy name	Type	Attached entities
AdministratorAccess	AWS managed - job function	2

Screenshot of Administrators Group with user added:

This screenshot shows the same AWS IAM console interface, but now the 'Users' tab is selected. The 'Summary' section remains the same. The 'Users in this group (1)' section shows a table with one user added: 'IAMUserInClass9-24'. The table has columns for User name, Groups, Last activity, and Creation time.

User name	Groups	Last activity	Creation time
IAMUserInClass9-24	1	4 minutes ago	14 minutes ago
